INTERNAL RISK FACTORS

- 1. Our business depends on our production facility in Punjab and the loss of or shutdown of operations of the production facility on any grounds could adversely affect our business or results of operations.***

Our production facility is subject to operating risks such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, raw material shortage or unsuitability, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, earthquakes and other natural disasters, pandemic, social unrests, industrial accidents, our ability to respond to technological advances and emerging industry and safety standards and practices in the industries in which we operate and propose to operate on a cost-effective and timely basis and any other factors which may or may not be within our control and also we need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition, results of operations and the trading price of our Equity Shares may be adversely affected by any disruption of operations at our facilities, including due to any shutdown of our operations due to any COVID-19 restrictive guidelines. Further, due to the geographic concentration of our manufacturing units in Punjab our operations are susceptible to local and regional factors, such as accidents, system failures, civil unrest as well as other adverse social, economic and political events in India, weather conditions, natural disasters, regional conflicts and

demographic and population changes, and other unforeseen events and circumstances which may disrupt our production and significantly affect our business, financial condition and profitability.

- 2. *We do not have long-term agreements with a majority of our customers. Any changes or cancellations to our orders or our inability to forecast demand for our products may adversely affect our business, results of operations and financial condition.***

Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. However, our company has in house sales and marketing team who bid to various clients for our product. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. For further details in relation to our Insurance, please refer to the section titled – Insurance in the chapter titled “Our Business” beginning on page 106 of this Draft Prospectus. The insurance policies are renewed periodically to ensure that the coverage is adequate, however, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “Our Business” beginning on page 106 of this Draft Prospectus

- 4. *We may need to seek additional financing in the future to support our growth strategies. Any failure to raise additional financing could have an adverse effect on our business, results of operations, financial condition and cash flows.***

It is important to note that we anticipate significant expenditures in maintaining and expanding our infrastructure, as well as in developing and implementing new technologies as part of our growth strategy. While historically we have primarily funded our capital expenditure through internal accruals and cash flow from operations, there is no guarantee that we will have sufficient capital resources for our current operations or any future expansion plans. In the event that our internally generated capital resources and available credit facilities are insufficient, we may need to seek additional financing from third parties. This could involve banks, venture capital funds, joint-venture partners, or other strategic investors. The ability to arrange financing and the costs of such financing are subject to various factors, including economic and capital market conditions, credit availability, and investor confidence. Additionally, debt financing may come with restrictive covenants that could impact our ability to operate and manage our business. Failure to secure financing in a timely manner, at a reasonable cost, and on acceptable terms could potentially impact our expansion plans and overall business, financial condition, and results of operations.

- 5. *Our business requires us to obtain and renew certain licenses and permits from government, regulatory authorities and other national/ international corporations and the failure to obtain or renew them in a timely manner may adversely affect our business operations.***

In addition, we may not be in compliance with certain conditions prescribed by such approvals or licences. Our failure to obtain such licences and approvals and comply with the applicable laws and regulations could lead to imposition of sanctions by the relevant authorities, including penalties. For further details, see “Government and Other Approvals” on page 201. Further, fresh and renewal applications for approvals, licenses, registrations and permissions for operating our business need to be made within certain timeframes. While we have made fresh applications for few approvals and licenses, we cannot assure you that we will receive these approvals in a timely manner or at all.

As of the date of this prospectus, the renewal process for our factory license is underway. However, there can be no assurance of a favourable outcome or timely renewal. The potential non-renewal of our factory license in timely manner could result in regulatory hurdles, operational interruptions, financial implications, and diminished investor confidence. It is imperative that investors carefully consider this risk factor and its potential implications as disclosed herein. We are actively engaged in addressing this risk and will endeavour to mitigate any adverse effects on our operations and financial performance to the best of our abilities.

6. *We have entered into, and will continue to enter into, related party transactions.*

We have entered into and may in the ordinary course of our business continue to enter into transactions with related parties that include certain of our Promoter, Promoter Group, Directors, and Key Managerial Personnel. For further details in relation to our related party transactions, see “Restated Financial Statements - Related Party Transaction” beginning on page 175 of this Prospectus. While we have entered into such transactions on an arm’s length basis, there is no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties.

7. *We are subject to various laws and regulations in jurisdictions where we operate, including environmental and health and safety laws and regulations, which may subject us to increased compliance costs, which may in turn result in an adverse effect on our financial condition.*

We may incur substantial costs to comply with requirements of environmental laws and regulations. In addition, we may discover currently unknown environmental problems or conditions. We are subject to significant national and state environmental laws and regulations, which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from our operations. Environmental laws and regulations in India are becoming increasingly stringent and it is possible that they will become significantly stringent in the future. In addition, failure to comply with environmental laws may result in assessment of penalties and fines against us by regulatory authorities. The commencement of environmental actions against us or the imposition of any penalties or fines on us as a result thereof could have a material adverse effect on our business prospects and results of operations.

8. *We may not be able to successfully manage the growth of our business if we are not able to effectively implement our strategies.*

It is important to acknowledge the potential risks and challenges associated with implementing growth strategies. Factors such as economic conditions, government policies, and operational capabilities can all impact the successful execution of expansion plans. It will be crucial to focus on effectively managing growth, including implementing and improving operational systems and internal controls in a timely manner. By addressing these potential obstacles, the business can work towards mitigating the adverse effects on its operations and financial condition.

9. *An inability to address changing industry standards and shift in consumer preference or taste may adversely affect our business, results of operations and financial condition.*

The future success of our business will depend in part on our ability to respond to consumer preferences and emerging industry standards and practices in a cost-effective and timely manner. While we continue to invest in various product development initiatives, adopt enhanced technologies and processes for the development of new products, we are subject to general risks associated with introduction and implementation of new products including the lack of market acceptance and delays in product development, change in consumer preference. There can be no assurance that we will be able to successfully develop new products or that such new products will receive market acceptance or adapt our manufacturing processes to incorporate new technologies or address changing consumer trends or emerging industry standards. Any rapid change in the expectations of our customers, dealers and end customers in our business on account of changes in technology or introduction of new alternate products could adversely affect our business, results of operations and financial condition.

10. *Changes in Technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernisation and technology Upgradation is essential in our industry to reduce costs and increase productivity. With latest technology and advancement of methods and machineries, our existing technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we strive to keep our technology, plant and machinery in line with the latest technological standards, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

11. *We depend on our senior management team and a loss of any of our senior management may affect our ability to operate or grow our business.*

Our success depends to a large extent upon the continued services of our senior management team. Our senior management are not bound by employment or non-competition agreements and we cannot assure you that we will be able to retain them or other executive officers. We could be adversely affected by the loss of any of our senior management or other executive officers. The market for such qualified professionals is competitive and we may not continue to be successful in our efforts to attract and retain qualified people. Our success also depends, in part, on key client relationships forged by members of our senior management. If we were to lose these members of our senior management, we cannot assure you that we will be able to continue to maintain key client relationships or renew them. If we are unable to retain these members of our senior management, our business, results of operations and financial condition may be affected.

12. *We may be exposed to the risk of delays or non-payment by our clients and other counterparties, which may also affect our cash flows and business.*

We also cannot guarantee that we will be able to collect all or part of past due payments. Any serious non-payment or non-performance by our customers, business partners, suppliers or other partners can affect the financial condition, results of operations and cash flows.

13. *The outbreak of COVID-19 or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

One significant risk factor related to COVID-19 is the disruption in supply chains. We heavily rely on a various supplier for components, raw materials, and equipment. Due to the pandemic, many countries implemented lockdowns, travel bans, and restrictions on manufacturing activities. If for any reason the same situation arises in the upcoming areas, it may affect the production schedules of solar panel manufacturers, potentially leading to project delays or increased costs. Moreover, if certain components or raw materials are sourced from heavily affected regions, their production and distribution may be severely impacted, causing prolonged delays in fulfilling orders or even halting production altogether. The risk of disruption in supply chains highlights the importance for companies to diversify their supplier base geographically and establish contingency plans for alternative sources of essential components. However, the uncertainty and risk associated with COVID-19 cannot be completely ignored.

14. *The Shortage or non- availability of power and fuel facility may adversely affect our manufacturing process and have an adverse impact on our results of operations and financial condition.*

Our business is dependent on the adequate and uninterrupted supply of electrical power and water at a reasonable cost. Our Company does not have suitable power back-up to meet power failure exigencies. Failure on account of unavailability of electrical power and water may restrict us in utilizing our full capacity and, hence, may impact our business and results of operation. Our

manufacturing process requires uninterrupted supply of electrical power and water in order to ensure that we are able to manufacture our products. The shortage or non-availability of electrical power and water may adversely affect our manufacturing process and have an adverse impact on our results of operations and financial condition. Currently, we source our power requirements from the state electricity board. There can be no assurance that electricity supplied will be sufficient to meet our requirements or that we will be able to procure adequate and uninterrupted power supply in the future at a reasonable cost. If the supply of electricity is not available for any reason, we will need to rely on alternative sources. Any failure on our part to obtain alternate sources of electricity, in a timely manner, and at an acceptable cost, may have an adverse effect on our business, results of operations, cash flows and financial condition. Further, if the per unit cost of electricity is increased by the state electricity board, our power cost will increase and it may adversely affect our profit margins. Additionally, we require water for process in manufacturing of our products and for human consumption. Any disruption / non availability of power and water or any failure on our part to arrange alternate sources of electricity and water supply, in a timely manner and at an acceptable cost shall directly affect our production which in turn shall have an impact on operations and results of our Company.

Further, if our suppliers fail to comply with applicable laws, including environmental laws, they risk having their facilities shut down, which may adversely affect our operations. The occurrence of any such event may adversely affect our business, results of operations and financial condition. We cannot assure you that we will always be able to arrange alternate sources of our raw materials, at prices acceptable to us, or at all, or that we will be able to pass on any increase in cost to our customers, although we endeavour to do so. In addition, raw materials and finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be a delay in delivery of raw materials and products which may also affect our business and results of operations negatively. In the event we fail to maintain a sufficient volume of raw materials and delivery of such materials to us is delayed, we may be unable to meet our purchase orders in a timely manner or at all, which may result in loss of sales opportunities that our competitors may capitalize on, thereby adversely affecting our business, financial condition, results of operations, and cash flows. Any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers and distributors. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products.

17. *If we are subject to any frauds, theft, or embezzlement by our employees, suppliers, contractors or distributors, it could adversely affect our reputation, results of operations, financial condition and cash flows.*

Our operations may be subject to incidents of theft. We may also encounter some inventory loss on account of employee/ contractor/ distributor/ vendor fraud, theft, or embezzlement. Although we have set up various security measures in our manufacturing facility such as deployment of security guards and operational processes such as periodic stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, loss in transit or similar incidents in the future, which could adversely affect our reputation, results of operations, financial condition, and cash flows.

Our competitors vary in size, and may have greater financial, production, marketing, personnel and other resources than us and certain of our competitors have a longer history of established businesses and reputations in the Indian textiles industry as compared with us. These conditions may continue indefinitely. Changes in the identity, ownership structure, and strategic goals of our competitors and the emergence of new competitors in our target markets may impact our financial performance. New competitors may include foreign-based companies and domestic producers who could enter our markets. In the recent past many companies in the textile industry have ramped up their capacities to encash opportunities arising from various favourable regulatory changes such as incentives under the textile policies of various states in India, incentives under mega textile parks scheme, TUFS etc. Huge additional capacities coming up are expected to increase competition amongst players in the textile industry and we may face pressures on pricing, product quality, turnaround time, order size etc., which may put strain on our profit margins.

30. Our operations are dependent on our ability to attract and retain skilled personnel and any inability on our part to do so, could adversely affect our business, results of operations and financial condition.

Our business is manpower intensive and our continued growth depends in part on our ability to recruit and retain suitable staff. Our success depends on our ability to attract, hire, train and retain skilled personnel particularly for our painting department and for our stitching department. As of March 31, 2024, we had a sufficient workforce of personnel for our operations. For details, see “*Our Business – Human Resources*” on page 118. We cannot assure you that we will be able to retain our personnel or find and hire personnel with the necessary experience or expertise. We may need to increase compensation and other benefits in order to attract and retain personnel in the future and that may affect our costs and profitability. In the event that we are unable to retain and hire such personnel or are unable to find suitable replacements in a timely manner, our business, financial condition and results of operations may be adversely affected.

31. Funding the working capital requirements of our Company, based on certain assumptions and estimates, constitutes a key objective of the Issue. Failure to effectively utilize these funds could adversely impact our operations.

The objects of the Offer include funding working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “Objects of the Offer” on page 74 of this Draft Prospectus

Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, and the non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised not to place undue reliance on such estimates of future working capital requirements.

32. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or fraud could expose us to business risks or losses, including regulatory sanctions, penalties, and serious harm to our reputation. Such employee misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may end in writing-off of such amounts and thereby adversely affecting the results of our operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

33. Delays or defaults in customer payments could adversely affect our financial condition.

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. Further, we may not receive advance payment from our customers after signing the purchase orders. Delays in customers' payments may require us to make a working capital investment. If a customer defaults in making payments where we have devoted significant resources or where we have invested significant resources is delayed, cancelled, or does not proceed to completion, it could have an adverse effect on our operating results. For the Fiscal ending March 31, 2023, 2022, and 2021, our trade receivables were ₹450.53 lakhs, ₹429.84 lakhs, and ₹711.48, respectively and for nine months ended December 31st, 2023 our trade receivables were 825.44 lakhs.. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

34. *Any future issuance of Equity Shares may dilute your shareholdings, and the sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares, and could significantly impair our future ability to raise capital through Issue of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

35. *Abundant dependence on IndusInd Bank in respect of Loan facilities obtained by our Company.*

Our company has been sanctioned credit facilities by IndusInd Bank. The Company is dependent on such facility for its Overdraft facilities and other funding requirement and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company.

36. *Industry information included in this prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this prospectus.

37. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

40. *Some of the details mentioned in the respective Documents of our promoters are not same as other KYC documents.*

Details of promoters and management such as Name shall be incorporated in the Prospectus. While going through the KYC documents such as Aadhaar Card, PAN, Passport, Driving License and Voter ID, it was found that certain details mismatch with each other. There is mismatch in Name and Address details in the KYCs of some Directors and promoters.

- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;

- changes in exchange rates;
- fluctuations in stock market prices and volume; and

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft Prospectus listed on SME platform of NSE in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the SME platform of NSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

43. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS

44. A slowdown in economic growth in India could cause our business to suffer.

Our performance and growth are dependent on the health of the Indian economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances,

terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any significant change may adversely affect our business and financials.

45. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

46. *Natural disasters, epidemics, pandemics, acts of war, terrorist attacks and other events could materially and adversely affect our business.*

Natural disasters (such as earthquakes, fire, typhoons, cyclones, hurricanes and floods), pandemics, epidemics, strikes, civil unrest, terrorist attacks and other events, which are beyond our control, may lead to global or regional economic instability, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations. Any of these occurrences could cause severe disruptions to our daily operations and may warrant a temporary closure of our facilities. Such closures may disrupt our business operations and adversely affect our results of operations. Our operation could also be disrupted if our customers or business partners are affected by such natural disasters or epidemics.

Furthermore, certain regions in India have witnessed terrorist attacks and civil disturbances and it is possible that future terrorist attacks or civil unrest, as well as other adverse social, economic and political events in India could have a negative effect on us. Transportation facilities, including vehicles, can be targets of terrorist attacks, which could lead to, among other things, increased insurance and security costs. Regional and global political or military tensions or conflicts, strained or altered foreign relations, protectionism and acts of war or the potential for war could also cause damage and disruption to our business, which could materially and adversely affect our business, financial condition, cash flows and results of operations. Such incidents could create the perception that investments in Indian companies involve a higher degree of risk and such perception could adversely affect our business and the price of the Equity Shares. We may also face difficulty in accessing certain parts of India at certain times of the year or under adverse or inclement weather conditions.

47. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include

- custom duties on imports of raw materials and components;
- Goods and Service These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

48. *Our business is affected by economic, political and other prevailing conditions beyond our control.*

We are Incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;

- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- hostile or war like situations with the neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis; and
- any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

49. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. *Any adverse change or downgrade in ratings of India may adversely affect our business, results of operations and cash flows.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

51. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies. Further, as a listed company we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could affect our business, prospects, results of operations and financial condition and the price of our Equity Shares. In addition, we may need to consider hiring additional legal and accounting personnel with expertise in listed company operations and technical accounting. However, we cannot assure you of prompt recruitment in this aspect.

52. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

Reasons for Raising Additional Working Capital

After successfully establishing a strong presence in the spinning and knitting sector of our company, we are now poised to venture into the garmenting sector, an emerging market where we aim to establish our brand. Our company wants to cash in the opportunity as we have established connects in the corporate sector and with the dealers having experience in this garmenting line of trade for more than 30 years. This expansion requires substantial funding for setting up the unit and securing the working capital since the credit period under this industry is for about 90-120 days.

In our spinning unit, our strategic advantage lies in stocking up on Raw cotton (our raw material for spinning unit). We stock up on Raw cotton majorly during the month of January- march as the supply of raw cotton is at its peak during that period due to which the prices of the raw cotton are the lowest during this time of the year. The Raw cotton aggregates to the 80% of the raw material requirement of our company, hence the stocking up of raw cotton at the lowest prices and using it for yarn production during non seasonal months provide us a competitive edge over the other market players. Further with the addition of knitting and garmenting unit to our company's portfolio, our investment requirements in inventories will increase. Thus we seek funds to support these initiatives.

GLOBAL ECONOMY

Global growth is expected to slow to 2.4 percent in 2024—the third consecutive year of deceleration—reflecting the lagged and ongoing effects of tight monetary policies to rein in decades-high inflation, restrictive credit conditions, and anemic global trade and investment. Near-term prospects are diverging, with subdued growth in major economies alongside improving conditions in emerging market and developing economies (EMDEs) with solid fundamentals. The recent conflict in the Middle East, coming on top of the Russian Federation’s invasion of Ukraine, has heightened geopolitical risks. Conflict escalation could lead to surging energy prices, with broader implications for global activity and inflation. Other risks include financial stress related to elevated real interest rates, persistent inflation, weaker- than-expected growth in China, further trade fragmentation, and climate change-related disasters.

Against this backdrop, policy makers face enormous challenges and difficult trade-offs. International cooperation needs to be strengthened to provide debt relief, especially for the poorest countries; tackle climate change and foster the energy transition; facilitate trade flows; and alleviate food insecurity. To boost longer-term growth, structural reforms are needed to accelerate investment, improve productivity growth, and close gender gaps in labor markets. At the global level, cooperation needs to be strengthened to provide debt relief, facilitate trade integration, tackle climate change, and alleviate food insecurity.

Regional prospects

Although some improvements in growth are expected in most EMDE regions, the overall outlook remains subdued. Growth this year is projected to soften in East Asia and Pacific—mainly on account of slower growth in China—Europe and Central Asia, and South Asia. Only a slight improvement in growth, from a weak base in 2023, is expected for Latin America and the Caribbean. More marked pickups in growth are projected for the Middle East and North Africa, supported by increased oil xviii production, and Sub-Saharan Africa, reflecting recovery from recent weakness. In 2025, growth is projected to strengthen in most regions as the global recovery firms.

Global outlook

GLOBAL ECONOMIC OUTLOOK

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down. Global growth is set to slow further this year amid tight monetary policy, restrictive financial conditions, and feeble global trade and investment. Downside risks include an escalation of the recent conflict in the Middle East, financial stress, persistent inflation, trade fragmentation, and climate-related disasters. Global cooperation is needed to provide debt relief, facilitate trade integration, tackle climate change, and alleviate food insecurity. Among emerging market and developing economies (EMDEs), commodity exporters continue to grapple with fiscal policy procyclicality and volatility. Across all EMDEs, proper macroeconomic and structural policies, and well-functioning institutions, are critical to help boost investment and long-term prospects.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and than assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes

from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

The global economic recovery from the COVID-19 pandemic, Russia’s invasion of Ukraine, and the cost-of-living crisis is proving surprisingly resilient. Inflation is falling faster than expected from its 2022 peak, with a smaller-than-expected toll on employment and activity, reflecting favorable supply-side developments and tightening by central banks, which has kept inflation expectations anchored. At the same time, high interest rates aimed at fighting inflation and a withdrawal of fiscal support amid high debt are expected to weigh on growth in 2024.

Supply chain pressures and supplier delivery times have dropped back to pre-pandemic levels as goods demand has weakened and global shipping conditions have improved. A rising number of new trade measures have been protectionist. The ongoing shift in global consumption toward less trade-intensive goods will likely continue to lower the growth rate of trade relative to output. This shift and subdued demand are expected to dampen global trade growth substantially this year.

For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area.

- In the *United States*, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the *euro area* is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy prices subside and inflation falls, supporting real income growth, is expected to drive the recovery. Compared with the October 2023 WEO forecast, however, growth is revised downward by 0.3 percentage point for 2024, largely on account of carryover from the weaker-than-expected outcome for 2023.
- Among other advanced economies, growth in the United Kingdom is projected to rise modestly, from an estimated 0.5 percent in 2023 to 0.6 percent in 2024, as the lagged negative effects of high energy prices wane, then to 1.6 percent in 2025, as disinflation allows an easing in financial conditions and permits real incomes to recover. The markdown to growth in 2025 of 0.4 percentage point reflects reduced scope for growth to catch up in light of recent upward statistical revisions to the level of output through the pandemic period. Output in Japan is projected to remain above potential as growth decelerates from an estimated 1.9 percent in 2023 to 0.9 percent in 2024 and 0.8 percent in 2025, reflecting the fading of one-off factors that supported activity in 2023, including a depreciated yen, pent-up demand, and a recovery in business investment following earlier delays in implementing projects.

INDIAN ECONOMY

India is one of the fastest growing economies of the world and is poised to continue on this path, with aspirations to reach high middle income status by 2047, the centenary of Indian independence. The growth of the past two decades has also led to India making remarkable progress in reducing extreme poverty. The growth of the past two decades has also led to India making remarkable progress in reducing extreme poverty. After real GDP contracted in FY20/21 due to the COVID-19 pandemic, growth bounced back strongly in FY21/22, supported by accommodative monetary and fiscal policies and wide vaccine coverage.

In FY22/23, India’s real GDP expanded at an estimated 6.9 percent. Growth was underpinned by robust domestic demand, strong investment activity bolstered by the government’s push for investment in infrastructure, and buoyant private consumption, particularly among higher income earners. The composition of domestic demand also changed, with government consumption being lower due to fiscal consolidation. Since Q3 FY22/23, however, there have been signs of moderation, although the overall growth momentum remains robust. The persisting headwinds – rising borrowing costs, tightening financial conditions and ongoing inflationary pressures – are expected to weigh on India’s growth in FY23/24. Real GDP growth is likely to moderate to 6.3 percent in FY23/24 from the estimated 6.9 percent in FY22/23

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronized policy rate hikes to curb inflation.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along

with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilization across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs.301.75 trillion (US\$ 3.62 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q1 of 2023-24 was Rs.70.67 trillion (US\$ 848.92 billion), as against Rs.65.42 trillion (US\$ 785.85 billion) in 2022-23, estimating a growth of 8%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) decreases to US\$ 9.2 billion in Q1 of 2023-24 from US\$ 17.9 billion in Q1 of 2022-2023.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush

Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of August 2023, India's foreign exchange reserves stood at US\$ 594.90 billion.
- In the first half of 2023-24, India saw a total of US\$ 21 billion in PE-VC investments.
- Merchandise exports in September 2023 stood at US\$ 34.47 billion, with total merchandise exports of US\$ 211.40 billion during the period of April-September (2023-24).
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- PMI Services remained comfortably in the expansionary zone at 62.3 in the month of June 2023.
- In September 2023, the gross Goods and Services Tax (GST) revenue collection stood at Rs.1,62,712 crore (US\$ 19.54 billion), of which CGST is Rs. 29,818 crore (US\$ 3.58 billion), SGST is Rs. 37,657 crore (US\$ 4.52 billion), IGST is Rs. 83,623 crore (US\$ 10.04 billion).
- Between April 2000–June 2023, cumulative FDI equity inflows to India stood at US\$ 937.58 billion.
- In August 2023, the overall IIP (Index of Industrial Production) stood at 145.1. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 111.9, 143.5 and 220.5, respectively, in August 2023.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- On October 7th, 2022, the Department for Promotion of Industry and Internal Trade (DPIIT) launched Credit Guarantee Scheme for Start-ups (CGSS) aiming to provide credit guarantees up to a specified limit by start-ups, facilitated by Scheduled Commercial Banks, Non-Banking Financial Companies and Securities and Exchange Board of India (SEBI) registered Alternative Investment Funds (AIFs).
- From April 1st, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Atma Nirbhar Bharat' and 'Local goes Global'.
- In July 2022, the Reserve Bank of India (RBI) approved international trade settlements in Indian rupees (Rs.) in order to promote the growth of global trade with emphasis on exports from India and to support the increasing interest of the global trading community.
- In August 2021, Prime Minister Mr. Narendra Modi announced an initiative to start a national mission to reach the US\$ 400 billion merchandise export target by FY22.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$

120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

TEXTILE INDUSTRY AND MARKET GROWTH IN INDIA

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employ more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Up gradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

Advantages of Textile industry in India:

1. **Robust Demand:** Cotton Production in India is projected to reach 7.2 million tonnes by 2030, driven by increasing demand from consumers. India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YOY. Mr. Piyush Goyal discussed the roadmap to achieve the target of US\$ 250 billion in textiles production and US\$ 100 billion in exports by 2030.
2. **Competitive Advantage:** India enjoys a comparative advantage in terms of skilled manpower and in cost of production, relative to major textile producers. In June 2022, Minister of Textiles, Commerce and Industry, Consumer Affairs & Food and Public Distribution, Mr. Piyush Goyal, stated that the Indian government wants to establish 75 textiles hubs in the country.
3. **Policy Support:** 100% FDI (automatic route) is allowed in textiles. Production-linked incentive (PLI) Scheme worth Rs. 10,683 crore (US\$ 1.44 billion) for manmade fibre and and technical textiles over a five-year period. The Indian government has notified uniform goods and services tax at 12% on man-made fabrics (MMF), MMF yarns and apparel, which came into effect from January 1, 2022. 1,83,844 beneficiaries trained across 1,880 centres under Samarth.

4. Increasing Investments: In June 2023, Government has approved R&D projects worth US\$ 7.4 million (Rs. 61.09 crore) in textile sector. Huge funds in schemes such as Rs. 900 crore (US\$ 109.99 million) for Amended Technology Upgradation Fund Scheme (ATUFS) have been released by the government in the union budget of 2023-24 to encourage more private equity investments and provide employment. Total FDI inflows in the textile Sector between April 2000-June 2023 stood at US\$ 4.31 billion.

India's ready-made garment (RMG) exports are likely to surpass US\$ 30 billion by 2027, growing at a CAGR of 12-13%. Exports for 247 technical textile items stood at Rs. 5,946 crore (US\$ 715.48 million) between April-June (2023-24). The Indian government wants to establish 75 textile hubs, similar to Tiruppur, which will greatly increase employment opportunities while promoting the export of textile products and ensuring the use of sustainable technology. Top players in the textiles sector are attaining sustainability in their products by manufacturing textiles that use natural recyclable materials. The textiles industry (including dyed and printed) foreign direct investment (FDI) worth US\$ 4.31 billion from April 2000-June 2023. 100% FDI (automatic route) is allowed in the Indian textile sector

OPPORTUNITIES IN TEXTILE SECTOR

1. Immense growth potential

The Indian textile industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand. The textile and apparel industry is expected to grow to US\$ 190 billion by FY26. In October 2021, the government announced the target to achieve US\$ 100 billion from India's textile exports in the next five years. Urbanization is expected to support higher growth due to change in fashion and trends.

2. Silk production

The total amount of Raw Silk produced was 28,106 MT. A total of 44 R&D projects were started, and 23 of them were successfully completed. 9,777 people were trained in a variety of activities relating to the silk industry. The Central Silk Board sets a target for raw silk production and encourages farmers and private players to grow silk. To achieve these targets, alliances with the private sector, especially agro-based industries in pre-cocoon and post-cocoon segments, are encouraged. The total raw silk production stood at 33,000 MT in FY21.

3. Bilateral relations

In October 2021, the Ministry of Textiles and GIZ (Deutsche Gesellschaft für Internationale Zusammenarbeit) signed an MoU to implement the 'Indo German Technical Cooperation' project. The project aims to increase the value addition from sustainable cotton production in the country. In March 2021, Pakistan approved reinstatement of cotton and sugar imports from India, indicating softening of bilateral relations.

4. Proposed FDI in multi-brand retail

For the textile industry, the proposed hike in FDI limit in multi-brand retail will bring in more players, thereby providing more options to consumers. It will also bring in greater investment along the entire value chain - from agricultural production to final manufactured goods. With global retail brands assured of a domestic foothold, outsourcing will also rise significantly.

5. Union Budget 2023-24

Under the Union Budget 2023-24, the government has allocated:

- Rs. 4,389.24 crore (US\$ 536.4 million) to the Ministry of Textiles.

If the OSHW bill is enacted, numerous regulations that are now covered through 13 different laws will be replaced by one regulation, simplifying business compliance for employers. This Code received the assent of President of India on September 28, 2020 though the implementation of the same is yet to be notified. Rules to implement the Code are expected to be finalized in the next few weeks. New establishments covered by the OSH Code must register themselves (within 60 days of commencement of the Code) with registering officers appointed by the appropriate government. Establishments already registered under any other federal law will not be required to register again.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public offers, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six working days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 ("T+3 Notification"). The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised

under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – issue LM will be required to compensate the concerned investor.

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.
